

Core brief

Thursday 1 March 2018

Introduction

This issue of Core Brief details information with regards to taxis.

Important information for staff coming to work in taxis from Network Private Hire

Staff mobile numbers are entered into Network's call system so that staff will receive a phone call when their taxi arrives at the NEAREST POINT THE DRIVER CAN ACCESS. (Your number won't be passed to a driver, but will be in a secure system.)

Please remain in your home until you receive the call confirming your taxi has arrived at its point of access and details on where that is.

You may need to be prepared to walk the distance to that point of access. So, please be prepared for the underfoot conditions.

On a number of occasions last night mobiles weren't answered or staff had already made their way in which impacted on effective taxi use. Please make sure you monitor your mobile.
