

Core brief

Friday 2 March 2018

Introduction

This issue of Core Brief details information with regards to the continued adverse weather.

Message to all staff

NHS Greater Glasgow and Clyde continues to be appreciative of the attempts staff are making to provide our patient services.

We will continue to use our Adverse Weather Policy throughout the coming days. We have asked all our managers to exercise reasonable judgment when dealing with queries regarding the various leave options within the policy.

Where staff have made an effort to get to work and where they have been unable to do so due to extreme conditions and have discussed this with their managers in these circumstances staff are not expected to lose out.

Should a manager and employee believe their circumstance does not fit within the policy this should be discussed with Human Resources.
