Introduction

This issue brings you up to date with Small Change Matters and the introduction of posters and “Idea of the Month”.

Small Change Matters

Let's make every NHS pound count – Small Change Matters is looking for your ideas... from savings on postage to standardising medical equipment every idea has its merits, no idea is too small so why not take a few minutes with your colleagues (if that helps) and get your thinking caps on and tell us your fantastic ideas! Don't assume that someone has already come up with your idea, every idea counts.

As part of our Financial Improvement Programme (FIP) we are issuing a series of posters and information about how you can really make a difference to the effectiveness of NHSGGC.

We've already had some fantastic ideas submitted that have been considered and worked up into savings plans, but we know there will be hundreds of efficiency ideas still to come. To encourage all your great ideas our FIP team will be rewarding the person or team that comes up with the best “Idea of the Month” with £50 and a personalised “Idea of the Month” certificates signed by the Chief Executive and Director of Finance.

All you have to do is fill out our online form at: www.nhsggc.org.uk/smallchangematters - it's really that simple.
