Introduction

This issue brings you information on the fire at Stobhill Hospital and our +ve about HIV campaign.

Stobhill Fire

There has been no impact on services at the new Stobhill Hospital following a fire in one of the derelict buildings on the campus.

The hospital is fully operational this morning and patients will continue to be seen and treated.

There are some temporary parking restrictions as the Fire Service remain on site to ensure the building is safe and all pockets of fire have been fully extinguished.

Parking attendants are on site directing staff, patients and visitors to the available parking spaces but we are asking people, where possible, to use public transport while these restrictions are in place.

+ve HIV campaign

The third phase of our HIV +ve campaign focuses on +ve Learning.

It is an opportunity to assure that all NHSGGC staff staff are confident and have current knowledge about HIV.

It's important that all staff take responsibility to know the basics, as everyone knows people living with HIV are now living longer healthier lives than ever before meaning that people living with HIV are now more likely to be using all NHSGGC services for non related HIV illness.
