

Core brief

Introduction

This issue brings you the latest news on our staff flu vaccination programme.

Staff flu vaccination

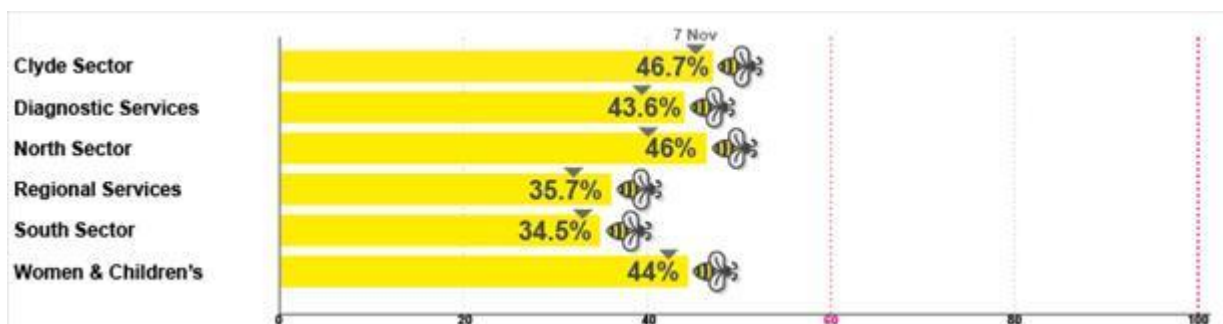

Since the Chief Executive's Team Brief was issued last week more than 2,500 members of staff have received their flu vaccination, totalling almost 15,000 staff who are protecting themselves, their patients and their family and friends.

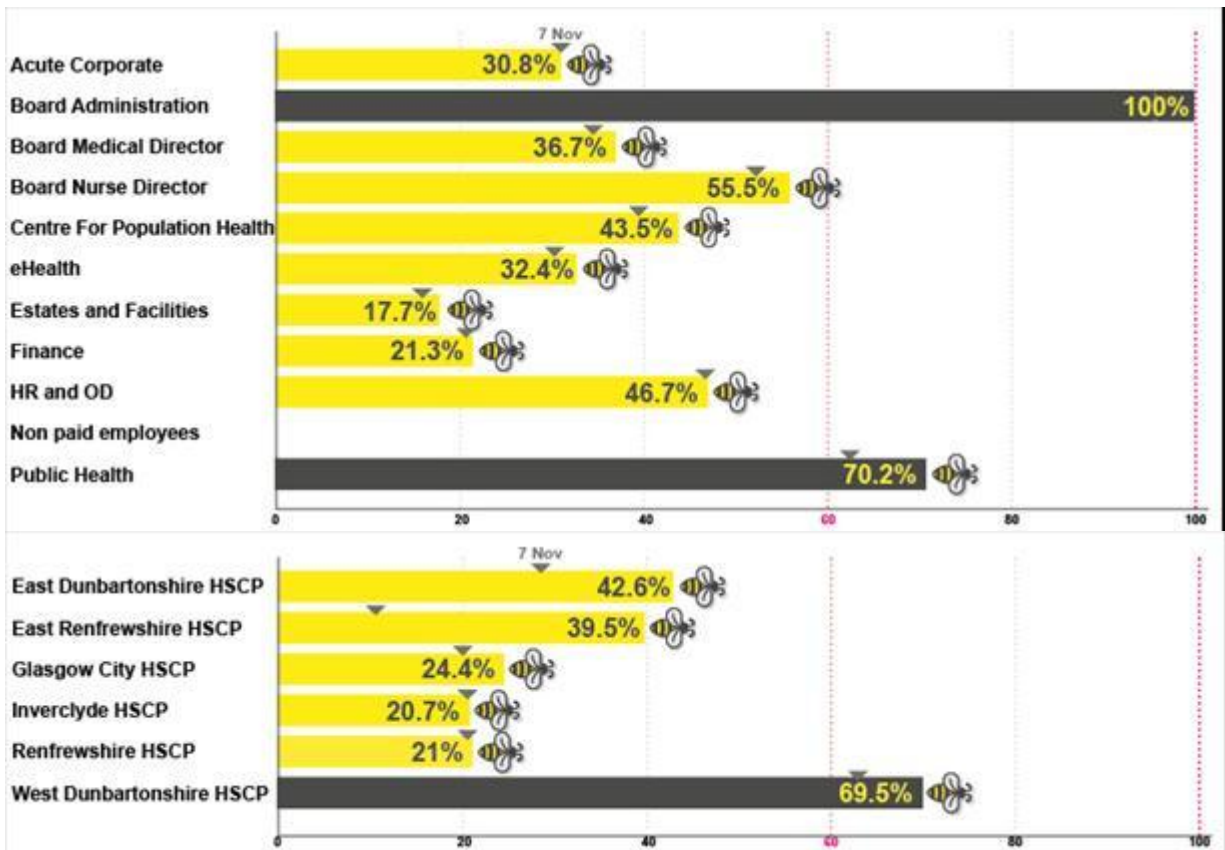

Our staff flu uptake graphs (below) show where is doing really well and where the challenge remains highest to ensure we protect and don't infect!

If you have still to receive your flu vaccination, there is still time, simply ask your local peer vaccinators to vaccinate you or contact occupational health.
