

Core brief

Introduction

This issue brings you news new guidance on countering abuse on social media and details two press releases – GRI has the highest IVF success rate and Gartnavel Royal receives accreditation from the Royal College of Psychiatrists.

Guidance on countering abuse on social media

Whilst many of us engage on social media without any problems, there are unfortunately times when our staff are subjected to abusive or hostile comments. As an employer we want to support staff who are experiencing this and we have therefore produced new guidance on how to help support staff who encounter abuse or offensive online behaviour. The guidance, which has been agreed by the Area Partnership Forum, is published today and is available on [HRConnect](#).

To coincide with this new guidance, we have also launched a social media campaign to support NHSGGC staff and take a stance against social media abuse. Please show your support of the campaign and like/share on Twitter, Facebook and Instagram: @NHSGGC.

[Click here](#) to access the guidance on HRConnect.

Glasgow home to highest IVF success rate in Scotland

Glasgow Royal Infirmary now has the highest IVF success rate in Scotland and the second highest in the UK. [Click here to read more.](#)

Gartnavel Royal Hospital's intensive psychiatric care unit first to receive accreditation in Scotland

A ward at Gartnavel Royal Hospital is the first of its kind in Scotland to get accreditation by the Royal College of Psychiatrists for its care of acutely mentally ill patients. [Click here to read more.](#)
