Daily update

(14 May 2021, 11.30am)

Topics in this Core Brief:

- Pulse Survey – Lateral Flow
- Green Health Week - What We're Doing
- Interruption to Telephone Interpreting Service
- Your Hospital Live Arts events

Pulse Survey – Lateral Flow

We appreciate and thank all our staff who are continuing to use the Lateral Flow Tests twice weekly as part of our range of measures to keep you, our patients, colleagues and families safe. However we know that not everyone has registered their kit and notice that our levels of staff recording their results on the portal is low. Using the LFD tests are even more important as we ease restrictions, especially given the signs that infection levels can increase very quickly again.

To ensure we are providing you with maximum support to use the kits and report your results we have developed a very short pulse survey to help us understand directly from you any barriers to the using the LFT kits in practice so we can ensure we're providing support if required and can address any issues you raise. The anonymous survey will remain open until the end of Wednesday (19 May) please take a minute to complete it. [Lateral Flow Test Staff Feedback](#) Thank you again as we continue to support the recovery process.

Interruption to Telephone Interpreting Service – Sunday 16 May

On Sunday May 16 between 6pm and midnight, BT will be performing some essential maintenance work which may cause temporary disturbance to the telephone interpreting service.

During this period if an ongoing call cuts off, please redial. Alternatively, you can use the following backup number for that call only – **02038 703482**

Green Health Week - What We're Doing

Queen Elizabeth University Hospital – Greenspace, Biodiversity and Urban Realm Review

The Sustainability Team recently commissioned an enabling works survey to review the campus. The study aims to explore and identify the potential of the Queen Elizabeth University Hospital (QEUH) campus landscape for the social, environmental and economic benefit of the hospital, its staff, patients and visitors and those who live in its vicinity. The study sets out the opportunities presented at a strategic level looking at green networks and active travel opportunities in the wider area. It then focuses on the campus itself and

seeks to find opportunities for active travel, biodiversity, wayfinding and navigability, arts and environmental improvements. This will bring benefits across the campus.

A crucial part of this process will be staff, patient and community engagement. So look out for future communications and surveys on the project!

Your Hospital Live Arts Events

Your Live Arts Events have gone digital. As the artists and performers can't be with you at the moment, they have created a unique selection box of online screenings. This bi-monthly Live Arts programme will be [hosted on StaffNet](#), (with live links) so keep checking for all the latest performance information and remember to share with your patients, family and friends.

Please keep up-to-date with the latest guidance on our dedicated web pages at: www.nhsggc.org.uk/covid19. If you have any questions about the current situation please check the [FAQs](#) first. If you have any further questions, please email: staff.covid19@ggc.scot.nhs.uk

Staff are reminded to make sure their [personal contact details are up to date on eESS](#).
